

The Importance of Environmental Responsibility

At KIMBERLY-CLARK PROFESSIONAL*, we understand that the way we use resources today will shape the world of tomorrow. That's why we're building sustainability into the very fabric of our business, focusing not only on products, but also on our operations, communities and employees.

We examine our products' whole lifecycle, from sourcing through disposal, to create products that reduce our overall environmental impact by reducing the use of resources at every stage.

Exceptional
Workplaces[®]

Reducing Throughout the Product Lifecycle

We strive to use less of the world's resources so there's more left for the future. We recognize that continually working to understand the environmental impacts of our business, help us to prioritize and minimize those impacts. Our solutions require us to consider more than just what the product is made with, we look at how they are manufactured, packaged, used, and disposed of.

We recommend products designed to:

- ▶▶ Reduce how much you use
- ▶▶ Reduce how much you waste
- ▶▶ Reduce how much goes to landfill
- ▶▶ Reduce how much it all costs

Our Lifecycle Approach to Sustainability

Product Design

We strive to design products that reduce consumption across the whole lifecycle.

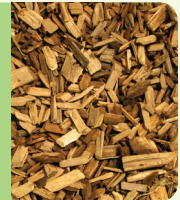

Final Disposal

Innovative products combined with reliable dispensing mean you can reduce how much gets used, wasted and thrown away.

Raw Materials

We are committed to responsible sourcing of raw materials and ensuring the sustainability of the fiber we use.

Reduce Today
Respect Tomorrow

Use

Our high performance products and systems aim to help customers reduce their usage.

Manufacturing

We invest in new technology and process improvements to reduce the use of natural resources and waste from manufacturing.

Transport

We continue to develop more efficient ways of packing, handling and transporting our products to reduce the impact of their distribution.

A Comprehensive Approach to Responsibility

Count on KIMBERLY-CLARK PROFESSIONAL* to help you achieve Exceptional Workplaces* for employees, customers and environmental stewardship. Our wide variety of product solutions help buildings and facilities meet the rigorous requirements for LEED® certification and ensure a work environment that is healthier, safer and more productive.

Point Earning Options - Leed Canada 2009

Our products can contribute to a building earning up to two points towards LEED Canada Existing Buildings: Operations and Maintenance Certification.

	Requirements	Points Earned
EQ Credit 3.1	Green Cleaning: High-Performance Cleaning Program Use sustainable cleaning materials, products, equipment, janitorial paper products, microfiber tools and wipes. (EQ Prerequisite: Green Cleaning Policy, see Green Cleaning page)	1
EQ Credit 3.3	Green Cleaning: Purchase of Sustainable Cleaning Products and Materials One point is awarded for 90% of the total annual purchases of these products (by cost) that meet at least one of the following: Disposable janitorial paper products that meet the minimum requirements of one or more of the following programs for the applicable product category: <ul style="list-style-type: none"> • U.S. EPA Comprehensive Procurement Guidelines for paper towels, bath tissue, facial tissue, napkins and paper wipers • Green Seal GS-09 for paper towels and napkins, Green Seal GS-01 for tissue paper • Environmental Choice CCD-082 for toilet tissue, Environmental Choice CCD-086 for hand towels • Janitorial paper products derived from rapidly renewable resources or made from tree-free fibers In addition, 30% of the total annual purchases of cleaning and maintenance products (by cost), excluding janitorial paper products, must meet at least one of the following sustainability criteria: Cleaning chemicals have a variety of requirements—see LEED Canada requirements for more details. Hand soaps meet one or more of the following standards: <ul style="list-style-type: none"> • No antimicrobial agents (other than as a preservative) except where required by health codes and other regulations (e.g., food service and health care requirements) • Green Seal GS-41, Environmental Choice CCD-104 for hand cleaners and hand soaps 	1

Beware of misinformation regarding the ability to accrue additional points for towel and tissue products. We recommend working closely with your LEED auditor and the CaGBC to ensure proper guidance.

Tenant-preferred brands support LEED® certification
KLEENEX® and SCOTT® Brand products not only contribute to your building's LEED certification, they're designed with patented ABSORBENCY POCKETS*, so users need fewer towels to dry their hands. The result: reduced waste and reduced costs for you.

Our products contain third party certifications such as Forest Stewardship Council® (FSC), EcoLogo®, or Green Seal™, assuring high environmental standards.

Products Designed to Reduce

BATH TISSUE

Code	Description	EPA	FSC	EcoLogo	Ply	Size	Units/Case	Qty/Unit
