Providing Peace of Mind... For You and Your Patients

Providing Peace of Mind... For You and Your Patients

Kimberly-Clark, a leader in the enteral feeding market, offers a wide variety of innovative, high-quality enteral feeding tubes and accessories uniquely designed for delivering nutrition and medication to pediatrics and adults.

As the pioneer in the development of the first balloon retained tube designed for gastrostomy feeding, Kimberly-Clark continues to manufacture our tubes and accessories with the highest standards of workmanship at our state-of-the-art manufacturing facilities. Our products provide consistent performance. Our products are designed for safety and convenience. We stand behind our products with knowledgeable sales and customer service professionals. Today, our KIMBERLY-CLARK* MIC* brand of Enteral Feeding Tubes is well recognized and accepted among healthcare professionals for intermediate and long-term feeding applications.

Innovative Product Designs

KIMBERLY-CLARK* MIC* Enteral Feeding Tubes and Accessories include a wide variety of innovative product designs for gastric, jejunal and gastro-jejunal access: from the lock and key design of the MIC-KEY* Low-Profile Feeding Tube extension set connection mechanism... to the one-piece MIC* Transgastric-jejunal Feeding Tube that allows simultaneous gastric decompression and jejunal feeding.

KIMBERLY-CLARK* MIC* Enteral Feeding Tubes and Accessories are just one of the clinical solutions that you can depend on to meet the demands of your fast-paced world.

Whether your needs involve preventing healthcare-associated infections, surgical and digestive solutions or pain management, with Kimberly-Clark you'll always have one less worry.

Most KIMBERLY-CLARK* MIC* Enteral Feeding Tubes Include:

- high clarity medical grade silicone construction, designed for visibility and drapability,
- ventilated SECUR-LOK* ring, the external retention mechanism designed to allow air to circulate around the stoma site and reduce tube pressure 360° from the sides of the stoma wall,
- a patented universal connector, designed to preserve tube life and minimize unintentional disconnects, and
- an inflatable internal retention balloon, which reduces patient trauma experienced with obturated devices.

The Right Choice

Helping your patients face the use of a gastrostomy tube, possibly for a lifetime, can be a challenge. Kimberly-Clark's variety of quality feeding tubes and accessories helps you make the right choice for your patient. By selecting MIC* Enteral Feeding Tubes you may be assured that you have chosen innovative products that consistently perform and are well recognized and accepted among healthcare professionals.

Innovative Product Designs

Gastric Access Feeding Tubes

KIMBERLY-CLARK* Gastric Access Feeding Tubes are designed for the delivery of enteral nutrition to the stomach, and are available in low-profile and conventional designs.

The **KIMBERLY-CLARK* MIC-KEY* Low-Profile Gastrostomy Feeding Tube** is a step up from conventional gastrostomy feeding tubes. Highly popular and widely prescribed, the MIC-KEY* feeding tube is unobtrusive and easy to conceal, making it an ideal feeding tube for virtually all individuals. Specific features include...

- Medical Grade Silicone Construction
- Low-Profile Design
- Tapered Distal Tip
- Inflatable Silicone Internal Retention Balloon
- Distal Tip Recessed at 5 ml
- Proximal Anti-Reflux Valve
- SECUR-LOK* Extension Set Connector Mechanism
- Radiopaque Stripe
- Wide Variety of Extensions Sets Available

The first of its kind, the **KIMBERLY-CLARK* MIC* Gastrostomy Feeding Tube** is indicated for patients requiring continuous enteral feeding. Specific features include...

- Recessed Distal Tip at Recommended Fill Volume
- Medical Grade Silicone Construction
- Inflatable Silicone Internal Retention Balloon
- SECUR-LOK* External Retention Ring
- Universal Feeding Port Connector
- Medication Port
- Tapered Distal Tip
- Dual Exit Ports
- Radiopaque Stripe

The **KIMBERLY-CLARK* MIC* Bolus Gastrostomy Feeding Tube** is utilized for patients who are on a bolus feeding regimen. Specific features include...

- Medical Grade Silicone Construction
- Recessed Distal Tip at Recommended Fill Volume
- Inflatable Silicone Internal Retention Balloon
- SECUR-LOK* External Retention Ring
- Tapered Distal Tip
- Dual Exit Ports
- Radiopaque Stripe

The **KIMBERLY-CLARK* MIC* Percutaneous Endoscopic Gastrostomy (PEG) Feeding Tube Kit** is designed for placement convenience and comes in complete placement kits for both the Pull and Push placement methods. Available in 14, 20 and 24 French sizes, the MIC* PEG is traction removable. Specific features include...

- Medical Grade Silicone Construction
- SECUR-LOK* External Retention Ring
- Universal and Bolus Feeding Port Connectors
- Medication Port
- Ethylene Oxide (ETO) Sterilized
- Collapsible Internal Retention Bumper
- Radiopaque Stripe and Bumper
- Tubing Clamp
- Available in PUSH (OTW) and PULL Placement Methods

Jejunal Access Feeding Tubes

KIMBERLY-CLARK* Jejunal Access Feeding Tubes are designed for the delivery of enteral nutrition to the small bowel, and are available in low-profile and conventional designs.

The **KIMBERLY-CLARK* MIC-KEY* Low-Profile Jejunal Feeding Tube** is indicated for patients requiring jejunal feeding only, but who want an inconspicuous external segment. With an external bolster designed like the widely prescribed MIC-KEY* gastrostomy tube, specific features include...

- Medical Grade Silicone Construction
- Low-Profile Design
- Tapered Distal Tip
- Inflatable Silicone Internal Retention Balloon
- Distal Tip Recessed at 5ml
- Proximal Anti-Reflux Valve
- SECUR-LOK* Extension Set Connector Mechanism
- Trimmable Distal Tip
- Radiopaque Stripe
- Wide Variety of Extension Sets Available

The **KIMBERLY-CLARK* MIC* Jejunal Feeding Tube** is indicated for patients requiring jejunal feeding only. The distal tip can be trimmed to suit individual patient needs. Specific features include...

- Medical Grade Silicone Construction
- Inflatable Silicone Internal Retention Balloon
- SECUR-LOK* External Retention Ring
- Universal Feeding Port Connector
- Medication Port
- Trimmable Distal Tip
- Radiopaque Stripe

The **KIMBERLY-CLARK* MIC* Jejunostomy Feeding Tube** is indicated for patients requiring jejunal feeding. It is surgically placed directly into the small bowel, utilizing the Witzel Tunnel technique for secure placement and to help minimize leakage. Featuring a large 9 French internal diameter to help prevent clogging. Specific features include...

- Medical Grade Silicone Construction
- Trimmable Distal Tip
- Suture Wings
- Large 9 French Internal Diameter
- Radiopaque Stripe

Gastro-Jejunal Feeding Tubes

Kimberly-Clark* Gastro-Jejunal Access Feeding Tubes are designed for the delivery of enteral nutrition to the small bowel while allowing simultaneous decompression of the stomach.

The **Kimberly-Clark* MIC-KEY* Low-Profile Transgastric-Jejunal Feeding Tube** is designed for pediatric and adult patients requiring simultaneous jejunal feeding and gastric decompression. The low-profile design is unobtrusive and easy to conceal. Available in several sizes and lengths to meet individual patient needs. Specific features include...

- Medical Grade Silicone Construction
- Low-Profile Design
- Silicone Internal Retention Balloon
- Gastric Decompression Port
- Multiple Gastric and Jejunal Exit Ports
- Tungsten Weighted Jejunal Portion
- SECUR-LOK* Extension Set Connector Mechanism
- Tapered Distal Tip
- Radiopaque Stripe

The unique **KIMBERLY-CLARK* MIC* Transgastric-Jejunal Feeding Tube** is also designed for patients who require simultaneous gastric decompression and jejunal feeding. Available in several sizes to meet individual patient needs. Specific features include...

- Medical Grade Silicone Construction
- Inflatable Silicone Internal Retention Balloon
- SECUR-LOK* External Retention Ring
- Universal Jejunal Feeding Port Connector
- Gastric Decompression Port
- Multiple Gastric and Jejunal Exit Ports
- Tungsten Weighted Jejunal Portion
- Tapered Distal Tip
- Radiopaque Stripe

The **KIMBERLY-CLARK* MIC* Gastro-Enteric Feeding Tube** is a precursor to the very popular MIC* Transgastric Jejunal Feeding Tube. Also designed for simultaneous gastric decompression and jejunal feeding, it is indicated for patients where a smaller distal jejunal segment may be indicated. Specific features include...

- Medical Grade Silicone Construction
- Inflatable Silicone Internal Retention Balloon
- SECUR-LOK* External Retention Ring
- Gastric Decompression Port
- Jejunal Feeding Port
- Multiple Gastric and Jejunal Exit Ports
- Radiopaque Stripe

Personal Care Tubes

KIMBERLY-CLARK* MIC* Bowel Management Kits and Tubes are designed for patient fecal incontinence.

The **KIMBERLY-CLARK* MIC* Bowel Management Kit** is intended as a self-administered bowel irrigation device to facilitate a controlled bowel movement and promote patient independence. Specific features include...

- Medical Grade Silicone Construction
- Inflatable Silicone Balloon
- Tapered Distal Tip
- Kit Configuration
- Non-Sterile

Accessories

KIMBERLY-CLARK* MIC* Accessories support gastric, jejunal, gastro-jejunal access feeding tubes and personal care tubes. Standard and DEHP-Free formulations available.

- SECUR-LOK* "Key" Connection Mechanism
- Medication Port on Non-Bolus Extension Sets
- Individually Packaged Extension Sets
- Tubing Clamp
- Extension Sets Non-Sterile
- Available in a DEHP-Free Formulation [Di-(2-Ethylhexyl)phthalate]
- Stoma Measuring Device

KIMBERLY-CLARK* MIC-KEY* Stoma Measuring Device assists in determining proper shaft length to ensure patient comfort and safety.
