Cultivating for Future Generations*
GreenHarvest* products made with 20% Plant Fiber
Let’s change the world of fiber.

Introducing GreenHarvest® products – a truly innovative offering that incorporates plant-based rapidly renewable fiber, such as bamboo and wheat straw, into trusted Kleenex® and Scott® Brand towel and tissue products.

It’s a pioneering approach to fiber sourcing that will transform the paper products industry. As a world leader in sustainability, Kimberly-Clark is paving the way – delivering innovative products along with the quality and performance that you’ve come to expect from our trusted brands.

Today, in a resource-constrained, digital world, with fewer sources of recycled fiber, and the need to put less pressure on natural forests, it’s important to continue exploring new fibers.

Partner with us and cultivate the future with the brands you know and trust.

What is GreenHarvest® plant-based fiber?

**It’s fiber, but it doesn’t come from trees.**
It comes from plants, such as wheat and bamboo.

**It’s rapidly renewable.**
Wheat and bamboo meet the U.S. Green Building Council’s definition of “rapidly renewable” materials, meaning they can regenerate in less than 10 years. This shorter harvesting cycle reduces the amount of land needed to support demand.

**It can be an agricultural byproduct.**
Wheat straw is the residue that remains after wheat is harvested. It puts fiber “leftovers” to good use.

**It’s domestically sourced wheat straw from U.S. farmers.**
Utilizing wheat straw in our products helps reduce farmland waste and provides additional income to farmers, by enhancing the value of their crops.
Rapid growth, bountiful harvests.

GreenHarvest® products, made with 20% rapidly renewable plant fiber, help to reduce pressure on natural forests and promote environmental stewardship.

Building a new supply chain.

Being first to market means forging new paths – developing new manufacturing processes as well as a unique supply chain to obtain wheat straw directly from U.S. farmers.

There was no model for what we were attempting to do. So we built it ourselves – providing additional revenue to farming communities and utilizing an abundant plant source.

Good for farmers. Good for future generations.
Exceptional Workplaces*, Sustainably Delivered

Sustainability is embedded into everything we do. GreenHarvest® products are part of our ongoing efforts to reduce our use of resources today. Kimberly-Clark Corporation currently sources 100% of our wood fiber from third-party certified suppliers. We are committed to continuing to invest in responsible forest management. Partner with us to cultivate the future with the brands you trust.
